On May 14, 2010, Beads of Courage made bead history when it launched artist beads into space as part of the payload on the NASA Atlantis Space Shuttle, Mission STS-132. The beads traveled 4.8 million miles at more than 17,500 miles per hour on board the final mission of the Atlantis Space Shuttle before returning to earth. Now the beads will be part of a traveling exhibit to cities around the USA. We hope that the Beads in Space Exhibit sparks the imagination and creativity of all who experience it!

**Remember, your imagination can take you anywhere!**

Follow where the beads go next on their earthly adventure...visit [www.beadsin.space.org](http://www.beadsin.space.org)
